

Bringing innovation to the corn herbicide market

We continue to deliver on farmer needs

Corteva Agriscience has tripled its share

of the Group 15 corn herbicide segment* through timely, on-target new brands. Our market share will keep growing as we continue to launch our new, innovative products.

Market share averages:

Resicore® XL herbicide

Proven, powerful weed control

- 3 effective modes of action
- Acetochlor, Mesotrione and Clopyralid
- Strong residual up to 8 weeks

Wider application window

- Post application window
- Can be applied from pre-plant up to corn up to 24" tall corn

Greater tank-mix compatibility

- Greater tank-mix compatibility with micronutrients, UAN and ATS
- Customize weed management

Increased crop safety

- Encapsulated acetochlor with less crop response
- Healthier crop leads to higher yield potential

Kyro™ herbicide

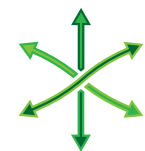

Novel formulation

- Unique combination of 3 proven MOAs
- First premix corn herbicide to combine acetochlor, topramezone and clopyralid

Strong post weed control

- Provides both post-emergence and residual control of broadleaf and grass weeds
- Fits perfectly into a two-pass program approach
- Another tool, outside of glyphosate and ALS herbicides, to fight against tough grasses

Greater versatility

- A fit for a wide variety of different types of corn - glyphosate tolerant, non-GMO, seed and popcorn
- Tank-mix flexibility with glyphosate, atrazine and other corn herbicides
- Versatility from emergence up to 24-inch tall corn

Excellent crop safety

- Encapsulated acetochlor with less crop response
- Healthier crop leads to higher yield potential
