## **Utrisha**<sup>™</sup>P

# **Increase Returns**

on Your Phosphorus Investment

## Utrisha™ P

Improves below-ground phosphorus availability for invigorated plant growth and resiliency.

- Increases access to plant-available phosphorus by releasing soil-bound phosphorus
- Stimulates root growth which helps crops reach more phosphorus

P Soil-bound Phosphorus

#### **Maximize**

Unlocks soil bound phosphorus to help crops reach their full potential

#### **Plant Health**

Increased root stimulation allows crops to reach more water and nutrients for overall improved crop vigor

#### **Flexible**

Versatile formulation allows for a low use rate, tank-mix flexibility, and extended shelf life

#### Composition

Bacillus amyloliquefaciens  $FZB45 \ CFU/g > 2.5 \times 10^{10}$ 

#### **Application**

Timing: Dependent on crop Corn: At plant application

Typical use rate: 3.5 - 7 fl oz/A

Higher rates may be beneficial in more stressful conditions, such as cold soils, saline soils, compacted soil, moisture stress or other.

#### **Recommendations**

#### **Application type:**

- · In-furrow applications at planting
- Exposure to roots is critical for colonization
- Bacteria will become activated in moist soil that is above 54°F

### **Compatibility:**

 Compatible with most liquid fertilizers and crop protection products with the exception of copper-containing products. Ask your local Corteva Agriscience representative for details on specific products.

#### **Tank mixtures:**

- Tank-mix pH should be between 5 8.5
- · Apply within 8 hrs of mixing
- · Light agitation is recommended to keep the solution in suspension.

## Storage:

- Best if stored at room temperature (77°F) and above freezing (32°F)
- Avoid exposure to temperatures above 85°F and do not store in direct sunlight
