Soybean program approach

Start clean with tillage or burndown Plant Enlist E3® soybeans

Apply soil residual herbicide*

Apply Enlist® herbicides Apply through R1 growth stage

HERBICIDE

Enlist Duo®

COLEX•D® technology

Enlist One®

COLEX·D® technology

(No plantback restriction for Enlist E3® soybeans)

HERBICIDE

Afforia® Sonic®

Enlite® Surveil®

Envive® Trivence® **HERBICIDE**

Enlist Duo® **Enlist One**®

COLEX•D® technology COLEX•D® technology

Apply glyphosate

Apply no later than R2 growth stage

Apply Liberty® herbicide Apply up to R1 growth stage

Liberty® Herbicide

Elevore®

Arylex[™]active

(See label for plantback restriction) **EverpreX**®

(Also layered residual use)

*Visit EnlistTankMix.com for a full list of qualified tank mix patterns with Enlist One® or Enlist Duo® herbicides. Always reference product labels for application cut-off timing.

Tillage or burndown Planting
