Cobalt Advanced

High-performance insect management tool

**Features:**
- With dual modes of action, Cobalt Advanced is an excellent resistance management tool
- Thorough crop coverage is enhanced through redistribution within the canopy
- Controls all developmental stages - egg, larvae, nymph, or adults of various insects such as aphids, beetles, grasshoppers, weevils, and worms
- Fast knockdown and excellent residual insect control of major pests
- Easy to handle and low odor formulation
- Tankmix compatibility with most commonly used crop protection products, nutrients/foliar feeds, and adjuvants
- Convenient to use – no mixing or measuring multiple products for different pests or crops
- More effective at higher temperatures than pyrethroids

**Application Instructions:**
- Recommended use rates: 6 – 38 ounces per acre – most common use rate range: 13 – 24 ounces per acre
- Use 10 – 20 gallons of water per acre for ground applications
- Use a minimum of 2 gallons of water per acre for aerial applications
- Apply at pest outbreak or prior to larvae emergences

*Cobalt Advanced is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. DO NOT apply or allow this product to drift to blooming crops or weeds if bees are visiting the treatment area (this is typical of many insecticides)
