

# Elevore<sup>®</sup>

Arylex™ active

HERBICIDE

## For Fall Burndown

### New active ingredient

Elevore<sup>®</sup> herbicide contains Arylex™ Active, a new active ingredient from the Arypicolimates family discovered by Corteva Agriscience.

#### Mode of action

Growth regulator

#### Site of action

Group 4

### Prevents regrowth of emerged weeds for clean fields at planting

Elevore provides thorough control of labeled weeds like henbit, lambsquarters, cutleaf evening-primrose and marehail up to 8" tall by rapidly absorbing into the plant's cells.

### Tank-mix compatible with commonly used burndown and residual partners

Elevore can be tank-mixed with a pre-emerge herbicide to start your fields clean at planting and sets the stage for optimum post-emergent applications.

### New resistance management tool for ALS and glyphosate resistant weeds

- Low use rate of 1 fl oz/A
- Excellent fit for no-till or reduced tillage production systems
- Labeled for burndown use ahead of soybean, corn and cotton

### Rotation intervals

Crops	Rotation Interval <sup>1</sup>
barley, canola, corn, millet, oat, rice, rye grasses, sorghum, soybean, sugarcane, sunflower, triticale and wheat (including spring, winter and durum)	14 days
cotton	30 days
alfalfa, brassica (cole) leafy vegetables, camelina, chickpea, clover, dry bean, peas (dry and succulent), flax, mustard, peanut, and safflower	9 months
other crops not listed	15 months

<sup>1</sup>Minimum time that must pass before planting crops after application of Elevore.
