Application Requirements Summary

**Plan**

_Aplication window_

Apply in Roundup Ready 2 Xtend® soybeans up to R1 growth stage or 45 days after planting, whichever comes first.

**Observe**

**Wind speed**

Apply when wind speed, measured at boom height, is between 3 and 10 mph.

**Weed height**

Apply when weeds are no more than 4 inches tall for best results.

**Time of day**

Apply only during the day, from one hour after sunrise through two hours before sunset.

**Apply**

**Application rate**

Spray at 22 fl. oz./A for all single, in-crop applications to dicamba-tolerant crops.

**Spray volume**

Apply a minimum of 15 GPA solution.

**Tank-mix products**

Use only qualified tank-mix partners, and never include ammonium sulfate or ammonium sulfate-based additives in any tank mix with FeXapan® herbicide Plus VaporGrip® Technology.

**Nozzles and operating pressure**

Use only qualified nozzles and corresponding operating pressures.

**Boom height**

Keep boom height no more than 24 inches above a target weed or crop canopy.

**Ground speed**

Do not exceed 15 mph ground speed.

**Training is required**

DuPont™ FeXapan® herbicide Plus VaporGrip® Technology can be applied only by certified applicators. Before spraying the product, the applicator must complete annual, mandatory dicamba or auxin-specific training.

**Buffers required**

Maintain the required 110-foot downwind buffer for all applications at 22 fl. oz./A.

Check the U.S. Environmental Protection Agency’s online Endangered Species Bulletin for the county where you plan to apply for potential additional buffer requirements.

**Sensitive crops**

Do not spray when wind is blowing toward adjacent sensitive crops.

**Avoid inversions**

Do not spray into a temperature inversion.

FeXapan herbicide Plus VaporGrip Technology is a Restricted Use Pesticide. For retail sale to and use only by Certified Applicators and only for those uses covered by the Certified Applicator’s certification. FeXapan herbicide Plus VaporGrip Technology is not registered for sale or use in all states.

**DO NOT APPLY DICAMBA HERBICIDE IN-CROP TO SOYBEANS WITH Roundup Ready 2 Xtend technology unless you use a dicamba herbicide product that is specifically labeled for that use in the location where you intend to make the application. IT IS A VIOLATION OF FEDERAL AND STATE LAW TO MAKE AN IN-CROP APPLICATION OF ANY DICAMBA HERBICIDE PRODUCT ON SOYBEANS WITH Roundup Ready 2 Xtend technology, OR ANY OTHER PESTICIDE APPLICATION, UNLESS THE PRODUCT LABELING SPECIFICALLY AUTHORIZES THE USE. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with soybeans with Roundup Ready 2 Xtend technology.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Soybeans with Roundup Ready 2 Xtend technology contain genes that confer tolerance to glyphosate and dicamba. Glyphosate herbicides will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba. Roundup Ready 2 Xtend® soybeans and VaporGrip® Technology are registered trademarks of Monsanto Technology LLC used under license.

### Remember

**Equipment cleanout**

Thoroughly clean entire spray system and all handling equipment before and after using FeXapan® herbicide Plus VaporGrip® Technology to avoid contamination.

**Record keeping**

Application records for every separate application of FeXapan herbicide Plus VaporGrip Technology must be kept for two years.

Additional state requirements may apply. Where state requirements are more stringent than federal requirements, state requirements must be followed.

Always read and follow all label instructions. This summary is not a substitute for reading the complete label for FeXapan® herbicide Plus VaporGrip® Technology.
