

2020

SOYBEAN

UNITED STATES PRODUCT USE GUIDE

Introduction

This 2020 Product Use Guide provides technical information about Corteva Agriscience™ soybean products and sets forth requirements and guidelines for the use of these products. Please read all of the information pertaining to the technology you will be using, including stewardship and related information.

This technical guide is not a pesticide product label. It is intended to provide additional information and to highlight approved uses from certain product labels. Read and follow all precautions and label instructions on any agricultural or pesticide products that you are using.

Not all products described in this Product Use Guide are available in all Corteva Agriscience™ brands.

Table of Contents

Stewardship Overview

A Message About Stewardship

Corteva Agriscience™ is committed to the responsible management of all its seed products.

Proper stewardship of Corteva Agriscience products is beneficial to growers and other stakeholders, including enabling continued grower access to Corteva leading germplasm and biotechnology traits in seed products and helping to enhance grower productivity and profitability. Proper stewardship also promotes responsible use of these products, such as mitigating potential resistance development to enhance long-term durability of Corteva Agriscience technologies. When combined with best management practices, Corteva Agriscience products provide options for growers and their customers.

By accepting delivery of any Corteva Agriscience brand product, growers are contractually obligated to comply with all laws, regulations, and Corteva Agriscience stewardship requirements described in Product Use Guide(s) and any product-specific stewardship requirements, as each may be amended from time to time by Corteva Agriscience. To help enable grower success and protect Corteva technologies, growers must agree and understand the stewardship requirements, such as potential grain use restrictions, including but not limited to:

- Sign and comply with the Corteva Agriscience™ Technology Use Agreement (TUA) at www.agcelerate.com, which may be amended from time to time. Signing the TUA permits access to the Corteva Agriscience germplasm and the biotech trait technologies in Corteva Agriscience seed products.
- Follow Stewardship requirements detailed in Product Use Guide(s), (www.corteva.us/Resources/trait-stewardship.html) and on product-specific labels.
- Read and follow all seed, pesticide, or other product labels and information.
- Implement appropriate product-specific Insect Resistance Management (IRM) and/or Herbicide Resistance Management (HRM) practices, as required by Corteva Agriscience and the U.S. Environmental Protection Agency (EPA). Following IRM and HRM requirements helps limit development of insect and herbicide resistance and helps to maintain the long-term durability of these technologies.
- Use of Corteva Agriscience seed products solely for producing a single commercial crop encourages the development of better, higher-yielding germplasm and additional technologies and innovations, further improving agricultural productivity.
- Growers are required to discuss trait acceptance and grain purchasing policy with the grain purchaser or grain handler prior to the delivery and sale of crop products (e.g., grain or other plant material containing biotech traits) and only deliver grain to a purchaser or grain handler that agrees grain and by-products will be marketed in markets where such products are authorized for the specific use. For more detailed information on the status of a trait or stack, please visit www.biotradestatus.com.
- Follow any additional stewardship requirements that Corteva Agriscience deems necessary for a particular product (e.g., grain or feed use or geographical planting restrictions, or use of an authorized herbicide).
- Any forward-looking statements made by Corteva Agriscience related to regulatory approval timelines by their nature address matters that are, to different degrees, uncertain. Any forward-looking statements of anticipated regulatory authorization timelines are not guarantees of government agency action and are based on certain assumptions and expectations of future events that may not be realized.
- Contact your local sales professional for more information.

By using Corteva Agriscience products, growers further understand and agree that (1) all crops and materials containing biotech traits (e.g., grain, meal, etc.) may only be (a) exported, transferred or moved to or (b) used, processed, or transferred in jurisdictions where all necessary regulatory authorizations have been granted for those crops and materials for such activities, (2) it may be unlawful to export, transfer, or move materials containing biotech traits across borders into jurisdictions where their import and use is not authorized, including through a third party, and (3) products authorized in the United States may or may not be authorized in all global markets; therefore, the combination of these traits and the grain and certain byproducts (including oil, meal, etc.) from these products may not be authorized in some markets.

Our Commitment to Excellence Through Stewardship®

www.excellencethroughstewardship.org

Corteva Agriscience™ is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS Product Launch Stewardship Guidance and in compliance with the Corteva Agriscience policies regarding stewardship of those products.

In line with these guidelines, our product launch process for responsible launches of new products includes a long-standing process to evaluate export market information, value chain consultations, and regulatory functionality. Growers and end-users must take all steps within their control to follow appropriate stewardship requirements and confirm their buyer's acceptance of the grain or other material being purchased.

For more detailed information on the status of a trait or stack, please visit www.biotradestatus.com.

Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

Intellectual Property Protection

Corteva Agriscience™ has a long history of investing in intellectual property to provide growers with high performing varieties and industry leading services. Our continued commitment to product research results in Corteva Agriscience brand products that consistently deliver high yields to help make you more profitable. Corteva Agriscience uses patents and Plant Variety Protection (PVP) laws to protect our investment in patented germplasm, native and transgenic traits, and breeding technologies. PVP laws give breeders exclusive control over plant varieties for up to 20 years, enabling Corteva Agriscience to bring new products to the marketplace supported by improved technology.

It is important to note that Corteva Agriscience product offerings, even if not biotech, can carry multiple types of intellectual property protection, such as patented genetics, patented breeding technologies, plant variety protection, patented transgenic traits, and patented native traits, including through the terms and conditions of use found in the Corteva Agriscience TUA.

The purchase of any Corteva Agriscience variety or trait is done so under license with certain limitations. By using the seed supplied in connection with a Corteva Agriscience Technology Use Agreement, you agree to the fact that the seed – and technology within that seed – includes subject matter owned by Corteva Agriscience, or licensed from a third party, that is protected under U.S. intellectual property laws. **Under this contract, you agree to a single-commercial planting of the seed and agree to not bin run or save your seed.**

Coexistence

For decades, multiple agricultural systems have successfully coexisted in the United States and around the world, from initial production through supply chains to the ultimate end users. Over time, management practices to facilitate these different agricultural systems have developed and have been continuously improved so that high purity and high quality seed and grain is available to help growers, handlers, and end-users maximize opportunities and take full advantage of the wide variety of technologies available to each. One example of successful coexistence is the production of similar commodities in close proximity, such as field corn, sweet corn, white corn, and popcorn. Coexistence strategies should be designed to meet market requirements using science-based industry standards and management practices, and should be flexible to facilitate diverse options and choice for growers and the food and feed supply chain. This flexibility also should include the ability of coexistence strategies to be modified as changes in products, markets, or practices take place. The on-going success of coexistence has depended upon cooperation, communication, flexibility, and mutual respect for each cropping system among the entire value chain. Over the years, growers have adapted to changes and innovation in agriculture by using new farm management practices, new technologies, and other appropriate practices and can continue to do so into the future.

It is therefore incumbent on all growers to consider and implement management practices to satisfy the relevant marketing and stewardship practices required by the desired end market. By choosing to grow any crop, growers are inherently agreeing to use practices appropriate to ensure the integrity and marketability of those crops for the intended market and that suitable management and stewardship practices are being implemented, considering each neighbors' farm management. This is true regardless of the particular market being served, whether it is specialty crops,

Why is a TUA required?

- A TUA is required for the purchase of any Corteva Agriscience seed - all crops, biotech and non-biotech. The TUA serves as an agreement between the customer and Corteva Agriscience demonstrating that the customer understands and agrees to follow all license terms, stewardship and applicable legal responsibilities related to their seed products.
- Even though some products do not contain biotech traits, the TUA protects the intellectual property associated with non-biotech products such as germplasm and other intellectual know-how and patents.
- The TUA grants a limited license for the grower to use/plant Corteva Agriscience seed containing Corteva Agriscience sourced technologies (including germplasm, non-biotech traits, and biotech traits) and produce a single commercial crop.
- The TUA requires growers to use and follow the applicable product use guide and labels (seed and herbicide).
- The TUA prohibits certain activities such as saving seed or use of unauthorized herbicides on Enlist™ crops (where applicable).

By abiding by your Corteva Agriscience Technology Use Agreement, you are helping Corteva Agriscience continue to invest in advances in genetics and technology that bring forward new research discoveries. These discoveries ultimately help you increase production and meet new pest and production challenges.

identity-preserved crops, organically-produced crops, conventionally produced crops or crops with biotech traits.

For products receiving premiums, the grower is producing a crop supported by a special market price, and therefore assumes responsibility for meeting any applicable market specifications to receive the applicable premium price from that market. Likewise, for products containing biotech traits that may not yet be approved in certain export markets or have special considerations related to production practices (e.g., herbicide application, specialty characteristics), the grower assumes responsibility for the stewardship conditions and implementation related to use of such technologies. Even though the ultimate responsibility is on the grower producing a crop for a particular market to implement appropriate stewardship practices and requirements, including those communicated by a seed provider, it is also each grower's responsibility to communicate with and be aware of the planting intentions of his or her neighbors to gauge the need for any appropriate management and coexistence practices. By communicating what is being grown on neighboring fields and the potential implications of those crops on each growers' management decisions, growers can utilize some of the following coexistence considerations to limit potential conflicts, while acknowledging the generally recognized and accepted occurrence of the movement of incidental amounts of pollen:

- What is the crop biology and what are the product characteristics, specifically considering whether or not the crop is self-pollinating or cross-pollinating;
- What options exist to arrange or select planting locations and fields to help minimize the potential for outcrossing to or from a particular crop, by considering, for example, appropriateness of buffer rows, environmental windbreaks, or land devoted to conservation;

- What options exist related to staggering planting times to help temporally isolate a given crop from the potential of unintended outcrossing;
- What are cleaning and handling options for a particular crop that could help to minimize the potential for inadvertent comingling during planting, harvesting or cleaning activities, considering the use of planters, combines, seed storage bins, seed hopper/boxes, transportation vehicles, and other equipment pre- and post-harvest; and

- Understanding characteristics of applied technologies or pest management tools and the potential impact to different types of crops planted in the vicinity.

In today's agricultural marketplace, growers share common goals of increasing productivity and profitability, and through planning and proactive management measures, coexistence can help all growers meet their productivity goals and stewardship responsibilities while respecting their neighboring farming operations.

Seed Treatment Stewardship

Seed treatments, including fungicides, insecticides, nematicides, and amendments, play a critical role in agriculture and the production of a healthy crop. In addition to helping manage against early season pests and diseases, they serve as a viable alternative to foliar and soil applications.

Seed treatment management and responsible stewardship play a vital role in sustaining our environment while maximizing crop health. Responsible stewardship practices help maintain seed and seed treatment integrity, which keeps the active ingredient on the seed to achieve the maximum crop health benefit for the investment. In addition, these practices help minimize the

potential for adverse effects on producers and the environment, including pollinators, which may be present at the time of planting.

Additional best management practices can be found: <http://seed-treatment-guide.com/>

For a short video on treated seed stewardship, click here or type into your web browser the following: <https://www.youtube.com/watch?v=pGGvILUNagw>

For more information on pollinator health visit: <http://honeybeehealthcoalition.org>

Steps for Stewardship of Treated Seed

Follow Directions –
Follow directions on treated seed container labeling for handling, storage, planting and disposal practices.

Minimize Dust –
Use advanced seed flow lubricants that minimize dust.

Eliminate Weeds –
Eliminate flowering plants and weeds in and around the field prior to planting.

BeeAware –
At planting, be aware of honey bees and hives located near the field, and communicate with beekeepers when possible.

Clean and Remove –
Completely remove all treated seed left in containers and equipment used to handle harvested grain, and dispose of it properly. Keep all treated seed out of the commodity grain channels.

For detailed information about stewardship of treated seed, check out www.seed-treatment-guide.com

Integrated Pest Management

As a grower, integrated pest management (IPM), provides you the opportunity to tailor how you manage weeds, insects, and diseases in your fields. IPM integrates responsible use of traits, crop protection products, and cultural management practices to:

- Prevent the buildup of pests through starting with a clean field and rotating crops and traits.
- Use seed products, planting technology, and seedling rates that are appropriate for a given crop in a particular geographic area.
- Scout: Monitor for pest populations throughout the growing season to determine if treatment is necessary.
- Intervene when required, using combination of approaches to manage the pest population.
- Use appropriate maturity products and harvest schedules, destroying crop residue promptly.
- Minimize over-wintering of pests through soil management practices.
- Use crop rotation, including products with different traits, to delay onset of resistance.
- Use multiple modes of action in crop protection products to reduce likelihood of resistance development.

Monitoring Insect Pests

It is important to carefully monitor fields for all pests to determine whether treatment with a pest control method is needed. Scouting techniques and remedial pest control treatments should address the fact that larvae must hatch and feed before incorporated plant protection technologies have an effect on the pests. Scouting should be performed regularly, particularly after periods of heavy or sustained egg laying (especially during bloom), to determine whether larval survival is significant in a particular field.

Weed Management

Herbicide tolerance technology provides convenient, effective, and economical weed control in crops. However, intensive long term use of any single herbicide mode of action can lead to the development of weeds resistant to that mode of action. Planting crops that enable use of multiple herbicide modes of actions as part of an IPM program can provide consistent, effective weed control while reducing the potential for resistance development. Talk to your local sales professional about the herbicide tolerance in your crops.

Enlist Duo® and Enlist One™ herbicides are not registered for sale or use in all states or counties. Contact your state pesticide regulatory agency to determine if a product is registered for sale or use in your area. Enlist Duo® and Enlist One™ are the only 2,4-D products authorized for use with Enlist crops. Consult Enlist herbicide labels for weed species controlled. Additional product-specific stewardship requirements for Enlist crops, including the

Corteva Agriscience™ supports the Take Action effort. Take Action is an industry-wide partnership between university scientists, major crop protection providers and organizations representing corn, cotton, sorghum, soybean and wheat growers to help them manage pests such as herbicide-resistant weeds. The Take Action effort encourages you to develop a proactive strategy to manage herbicide-resistant weeds that incorporates a diverse set of controls. To find out more about how you can take action, visit www.iwilltakeaction.com, or contact your local extension office.

CORTEVA AGRISCIENCE DOES NOT MAKE ANY REPRESENTATIONS, WARRANTIES OR RECOMMENDATIONS CONCERNING THE USE OF PRODUCTS MANUFACTURED OR MARKETED BY OTHER COMPANIES INCLUDING BUT NOT LIMITED TO THOSE THAT ARE LABELED FOR USE IN CROP(S) CONTAINING CORTEVA TECHNOLOGY. CORTEVA AGRISCIENCE AND ITS AFFILIATED COMPANIES SPECIFICALLY DISCLAIMS ALL RESPONSIBILITY FOR THE USE OF THESE PRODUCTS IN CROPS CONTAINING CORTEVA TECHNOLOGY. ALL QUESTIONS AND COMPLAINTS ARISING FROM THE USE OF PRODUCTS MANUFACTURED OR MARKETED BY OTHER COMPANIES, OR THE IMPACT TO CORTEVA TECHNOLOGY FROM THE USE OF SUCH PRODUCTS, SHOULD BE DIRECTED TO THOSE COMPANIES. IT IS GROWERS OBLIGATION TO READ AND FOLLOW PRODUCT LABEL REQUIREMENTS. CORTEVA AND ITS AFFILIATED COMPANIES ARE NOT RESPONSIBLE FOR ANY MISUSE OR MISAPPLICATION OF PRODUCTS, INCLUDING PESTICIDES, BY A GROWER.

Additional stewardship information may be found at www.corteva.us or consult your local sales professional. You may also contact Corteva Agriscience at: 877-4-TRAITS (877-487-2487).

Enlist™ Product Use Guide, can be found at www.Enlist.com. Always read and follow label directions.

Herbicide Groups

The Weed Science Society of America categorizes herbicides into different groups based on their mode of action. If a given weed population has plants resistant to a herbicide in one group, that weed population may not be able to be effectively managed using only other herbicides in that group. However, that weed population may be able to be managed with a different herbicide from a different herbicide group, whether alone or in combination with a herbicide from that same group, or by using other weed management practices, such as mechanical practices. Note that herbicide classification may not, in all circumstances, address weeds resistant to particular herbicides. Consult your local sales professional, state cooperative extension service, professional consultants, or other qualified individuals to discuss appropriate actions to address specific weeds that appear to show resistance to a particular herbicide.

Weed Management Techniques and Guidelines

Using varied weed control methods is recommended to help slow the development of resistant weed populations. Such varied weed control methods may include using multiple herbicides that act on weeds through different modes of action with similar spectrum, use of tillage or other mechanical methods, and other practices. Use of tillage must be balanced against possible soil and water conservation issues that aggressive tillage may cause. When using herbicides, studies have shown that using the herbicide in compliance with label directions and at labeled rates is important to slow the development of resistant weeds. Also, scouting for surviving weeds after herbicide application can help identify resistant weeds and provide valuable information on how to manage resistance by using different weed management methods. If resistant weeds are identified, one of the most effective ways to inhibit the development of resistant populations or spread of resistance is to use methods that prevent weeds from reproducing by seed or through vegetative propagation. It is also important to clean equipment between sites, as this slows the spread of weed seed between fields.

When using herbicide tolerant crops it is important to start with a clean field, either by using tilling or a burndown herbicide application. In general:

- Begin the season with a clean, weed-free field.
- Use multiple weed control techniques, such as multiple herbicides with different modes of action, tillage, or other mechanical weed control techniques, considering soil and water conservation issues.

- Use herbicides at their proper rates at the appropriate times and following all label directions.
- If surviving weeds are found, control those weeds before they can set seed or otherwise reproduce.

Herbicide Resistant Weeds

Grower awareness and proactive management of herbicide resistant weeds are part of a successful weed control program. Suspected herbicide resistance is defined as the situation where the following three indicators occur at a site or location:

- Failure to control a weed species normally controlled by the herbicide at the dose applied, especially if control is achieved on adjacent weeds.
- A spreading patch of non-controlled plants of a particular weed species; and
- Surviving plants mixed with controlled individuals of the same species.

With confirmed herbicide resistance, other weed management practices should be employed to control and prevent the spread of a population of herbicide resistant weeds. Your Corteva Agriscience™ sales professional can provide recommendations for a particular herbicide resistant weed. Report any incident of non-performance against a specific weed of the herbicide used to your Corteva sales professional, local retailer, or county extension agent. Corteva herbicide product labels include weed resistance management language and approved labels, including supplemental labeling, must be in possession of the user at the time of pesticide application and can be obtained by contacting your state's pesticide lead agency or the website www.cdms.net.

Glyphosate Endangered Species Initiative Requirement

Before making an application of any glyphosate-based herbicide product, licensed growers of crops containing Roundup Ready® Technology must access the website pre-serve.org to determine whether any mitigation requirements apply to the planned application to those crops, and must follow all applicable requirements. The mitigation measures described on the website are appropriate for all applications of any glyphosate-based herbicide to all crop lands. Growers making ground or air applications to crop land with a use rate of less than 3.5 lbs or 0.7 lbs of glyphosate a.e./A, respectively, or glyphosate applied in Alaska, Oklahoma, Pennsylvania or South Dakota are not required to access the website. If a grower does not have web access, the seed dealer can access the website on behalf of the grower to determine the applicable requirements, or the grower can call **1-800-332-3111** for assistance.

Soybean Technologies

Not all products described in this Product Use Guide are available in all Corteva Agriscience™ brands.

	<p>When you plant Enlist E3™ soybean varieties, you get crop tolerance to 2,4-D choline, glyphosate and glufosinate. Enlist E3 soybeans provide crop tolerance that enables you to use Enlist Duo® or Enlist One™ herbicide as part of a program approach for weed control. See Enlist Product Use Guide and consult www.Enlist.com for more information.</p>
	<p>Plenish® high oleic soybean oil offers consumer nutrition benefits with broad applications. It represents a soy-based trans fat solution for food companies and restaurants, with the taste consumers prefer. For more information on Identity Preservation related to Plenish soybeans, refer to https://www.pioneer.com/home/site/us/products/soybean/enhanced-oil-soybeans/.</p>
	<p>BOLT® technology offers customers a herbicide system for cleaner fields and more options to adjust crop acres with changing market and growing conditions. BOLT technology enables farmers to plant soybeans immediately following burndown with DuPont™ LeadOff® or DuPont™ Basis® Blend herbicides for effective, long-lasting control of problem weeds.</p>
	<p>Soybean varieties with Roundup Ready 2 Xtend® Technology contain in-plant tolerance to glyphosate and dicamba herbicides. Refer to the Monsanto Technology Use Guide at tug.monsanto.com for more information on these traits and proper use practices.</p>
	<p>Soybean varieties with Genuity® Roundup Ready 2 Yield® or other Glyphosate Tolerant traits contain in-plant tolerance to the active ingredient in Roundup® agricultural herbicides. Please refer to the Monsanto Technology Use Guide at tug.monsanto.com for more information on these traits and proper use practices.</p>
	<p>Soybeans with the LibertyLink® trait have built-in tolerance to Liberty® herbicide.</p>
	<p>Soybeans with the STS® trait have built-in tolerance to specific sulfonylurea soybean herbicides such as DuPont™ Synchrony® XP and DuPont™ Classic® and any additional herbicides to be developed and as clearly noted on their herbicide label.</p>

Product Use Statement

Product	Product Use Statement
	<p>Enlist E3™ soybeans contain the Enlist E3 trait that provides crop safety for use of labeled over-the-top applications of glyphosate, glufosinate and 2,4-D herbicides featuring Colex-D® technology when applied according to label directions. Following burndown, the only 2,4-D containing herbicide products that may be used with Enlist™ crops are products that feature Colex-D technology and are expressly labeled for use on Enlist crops. 2,4-D products that do not contain Colex-D technology are not authorized for use in conjunction with Enlist E3 soybeans.</p> <p>WARNING: Enlist E3 soybeans are tolerant of over-the top applications of glyphosate, glufosinate, and 2,4-D. Accidental application of incompatible herbicides to this variety could result in total crop loss. When using 2,4-D herbicides, grower agrees to only use 2,4-D products that contain Colex-D technology authorized for use in conjunction with Enlist E3 soybeans. Always read and follow herbicide label directions prior to use.</p> <p>YOU MUST SIGN A TECHNOLOGY AGREEMENT, READ THE PRODUCT USE GUIDE PRIOR TO PLANTING.</p> <p>THIS SEED IS ACQUIRED UNDER AN AGREEMENT THAT INCLUDES THE FOLLOWING TERMS: These seeds are covered under Dow AgroSciences and MS Technologies Patent Rights which can be found at: www.corteva.us/Resources/trait-stewardship.html. The purchase of these seeds conveys no license under said patents to use these seeds. A license must first be obtained from Dow AgroSciences by signing a Technology Use Agreement and abiding by the terms and conditions of the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use Requirements detailed therein which can be found at www.corteva.us/Resources/trait-stewardship.html.</p> <p>The transgenic soybean event in Enlist E3™ soybeans is jointly developed and owned by Dow AgroSciences LLC and M.S. Technologies, L.L.C.</p> <p>®™ Enlist, Enlist E3, the Enlist E3 logo, and Colex-D are trademarks of The Dow Chemical Company ("Dow") or an affiliated company of Dow.</p>
	<p>This variety contains the BOLT® technology. WARNING: The BOLT technology will only safeguard this variety against applications of sulfonylurea (SU) herbicides registered for use with soybeans. The BOLT technology will NOT safeguard this variety against other herbicide chemistries which are labeled to be used only over-the-top of crops that have a different and specified herbicide resistance gene. Always read and follow herbicide label directions prior to use.</p> <p>ACCIDENTAL APPLICATION OF INCOMPATIBLE HERBICIDES TO THIS VARIETY COULD RESULT IN TOTAL CROP LOSS.</p> <p>YOU MUST SIGN A TECHNOLOGY USE AGREEMENT, READ THE PRODUCT USE GUIDE PRIOR TO PLANTING.</p> <p>The purchase of these seeds includes a limited license to produce a single soybean crop in the United States (or other applicable country). This license does not extend to the use of seed of such crop or the progeny thereof for propagation or seed multiplication. Furthermore, the use of such seed or the progeny thereof for propagation or seed multiplication or for production or development of a different variety of seed is strictly prohibited.</p> <p>Always follow grain marketing, stewardship practices and pesticide label directions. Varieties with BOLT technology provide the highest degree of plant-back flexibility for soybeans following application of SU (sulfonylurea) herbicides such as DuPont™ LeadOff® or DuPont™ Basis® Blend as a component of a burndown program. BOLT®, DuPont™, LeadOff® and Basis are trademarks and service marks of Dow AgroSciences, DuPont or Pioneer, and their affiliated companies or their respective owners.</p>
	<p>Roundup Ready 2 Xtend® Soybeans contain MON 87708 and MON 89788.</p> <p>Roundup Ready 2 Xtend® Soybeans have tolerance to glyphosate and dicamba herbicides when applied according to label directions. ALWAYS READ AND FOLLOW DIRECTIONS FOR USE ON PESTICIDE LABELING. IT IS A VIOLATION OF FEDERAL AND STATE LAW to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba or glyphosate are approved for in-crop use with Roundup Ready 2 Xtend® soybeans. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with Roundup Ready 2 Xtend® soybeans.</p> <p>ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready 2 Xtend® Soybeans contains genes that confer tolerance to glyphosate and dicamba. Glyphosate herbicides will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba.</p> <p>YOU MUST SIGN A TECHNOLOGY USE AGREEMENT (TUA), READ THE PRODUCT USE GUIDE PRIOR TO PLANTING.</p> <p>THIS SEED IS ACQUIRED UNDER AN AGREEMENT THAT INCLUDES THE FOLLOWING TERMS: The licensed U.S. Patents for Roundup Ready 2 Xtend® technology can be found at the following web page www.monsantotechnology.com. Only Monsanto licensed seed companies and their authorized dealers have the authority to offer this seed for sale. Your purchase and/or possession of this seed conveys no patent or other intellectual property licenses covering the seed or its uses. By opening this bag and using this seed, you are affirming your obligation to comply with the entire current TUA, available from your authorized sales professional, including the most recent stewardship requirements for this seed.</p> <p>Roundup Ready 2 Xtend® is a trademark of Monsanto Technology LLC.</p>

Product Use Statement

Product	Product Use Statement
	<p>Roundup Ready 2 Yield® Soybeans contain MON 89788. Roundup Ready 2 Yield® technology provides crop safety for over-the-top applications of labeled glyphosate herbicides when applied according to label directions.</p> <p>WARNING: The Roundup Ready gene will only safeguard this variety against applications of glyphosate. The Roundup Ready gene will NOT safeguard this variety against other herbicide chemistries which are labeled to be used only over-the-top of crops that have a different and specified herbicide resistance gene. Always read and follow herbicide label directions prior to use.</p> <p>ACCIDENTAL APPLICATION OF INCOMPATIBLE HERBICIDES TO THIS VARIETY COULD RESULT IN TOTAL CROP LOSS. Grower may use any selective herbicide labeled for soybeans at grower's discretion and risk. Grower agrees to use on Roundup Ready 2 Yield® Soybeans only one of the labeled glyphosate herbicides or other non-selective herbicides which have been registered and labeled for use on Roundup Ready 2 Yield® Soybeans by all appropriate regulatory agencies.</p> <p>YOU MUST SIGN A TECHNOLOGY USE AGREEMENT, READ THE PRODUCT USE GUIDE PRIOR TO PLANTING.</p> <p>THIS SEED IS ACQUIRED UNDER AN AGREEMENT THAT INCLUDES THE FOLLOWING TERMS: The licensed U.S. Patents for Roundup Ready 2 Yield® technology can be found at the following web page www.monsantotechnology.com. Only Monsanto licensed seed companies and their authorized dealers have the authority to offer this seed for sale. Do not open this bag of seed unless you have read, understood and accepted a valid and current Corteva Agriscience™ Technology Use Agreement (TUA) as this seed may not be planted without a fully accepted TUA. Your purchase and/or possession of this seed conveys no patent or other intellectual property licenses covering the seed or its uses. By opening this bag and using this seed, you are affirming your obligation to comply with the entire current TUA, available from your authorized sales professional, including the most recent stewardship requirements for this seed.</p> <p>Roundup®, Roundup Ready®, and Roundup Ready 2 Yield® are registered trademarks of Monsanto Technology LLC.</p>
<p>Glyphosate Tolerant</p>	<p>This variety contains genes that confer tolerance to glyphosate herbicides. YOU MUST SIGN A TECHNOLOGY AGREEMENT, READ THE PRODUCT USE GUIDE PRIOR TO PLANTING.</p> <p>WARNING: Glyphosate herbicides will kill crops that are not tolerant to glyphosate. Glyphosate tolerance will NOT safeguard this variety against other herbicide chemistries which are labeled to be used only over-the-top of crops that have a different and specified herbicide resistance gene. Always read and follow herbicide label directions prior to use. Always follow grain marketing, stewardship practices and pesticide label directions.</p> <p>ACCIDENTAL APPLICATION OF INCOMPATIBLE HERBICIDES TO THIS VARIETY COULD RESULT IN TOTAL CROP LOSS.</p>
<p>LIBERTY LINK</p>	<p>These seeds contain the LibertyLink® trait. These seeds and the plants grown from these seeds produce the PAT (phosphinothricin acetyltransferase) protein that provides resistance to Liberty® herbicide (glufosinate). YOU MUST SIGN A TECHNOLOGY USE AGREEMENT AND READ THE PRODUCT USE GUIDE PRIOR TO PLANTING THESE SEEDS. You acknowledge and agree that BASF is a third party beneficiary of the 1) Technology Agreement, 2) the Use Restrictions, Limitation of Warranty and Liability; Other Terms on this bag, and 3) the product use statements attached to this bag, and may enforce the terms and conditions in all these agreements against the purchaser of this seed bag and all persons acting on his behalf.</p> <p>WARNING: You may use any glufosinate herbicide, but only if it has federally approved label instructions for use over soybeans containing the Soybean Event, and the product and the use label for such soybeans have been approved by your specific state. Contact the product manufacturer, the local retailer or the local extension agent for confirmation that the product carries EPA and state approved labeling for this use. BASF DOES NOT MAKE ANY REPRESENTATIONS, WARRANTIES OR RECOMMENDATIONS CONCERNING THE USE OF GLUFOSINATE HERBICIDE(S) OTHER THAN THE BASF GLUFOSINATE HERBICIDE (LIBERTY®) WHICH ARE LABELED FOR USE OVER SOYBEAN CONTAINING THE SOYBEAN EVENT. BASF SPECIFICALLY DENIES ALL RESPONSIBILITY AND DISCLAIMS ANY LIABILITY FOR ANY DAMAGE FOR THE USE OF OTHER GLUFOSINATE HERBICIDES OVER-THE-TOP OF SOYBEANS CONTAINING THE SOYBEAN EVENT. ALL QUESTIONS AND COMPLAINTS CAUSED BY THE USE OF GLUFOSINATE HERBICIDES OTHER THAN LIBERTY® SHOULD BE DIRECTED TO THE SUPPLIER OF THE PRODUCT IN QUESTION. ACCIDENTAL APPLICATIONS OF INCOMPATIBLE HERBICIDES TO THIS VARIETY COULD RESULT IN TOTAL CROP LOSS.</p> <p>The herbicide resistance technology contained in these seeds is protected under one or more of the following U.S. patent number: RE44,962 and may also be subject to other intellectual property rights. The conditional purchase of these seeds does not convey a license under said patents to perform a method covered by these patents or to use these seeds in any way, except to produce a single commercial crop (one-time use only) in the United States, and harvesting the grain solely for food or feed applications or for industrial processing. In no event shall this seed be used in research or breeding or for production of planting seed.</p> <p>Liberty® LibertyLink® and the Water Droplet Design are registered trademarks of BASF.</p>
<p>DuPont™ STS® herbicide tolerant gene</p>	<p>This variety contains a trait providing enhanced tolerance to specific sulfonylurea soybean herbicides such as DuPont™ Synchrony® XP and DuPont™ Classic® and any additional herbicides to be developed and as clearly noted on their herbicide label. YOU MUST SIGN A TECHNOLOGY USE AGREEMENT, READ THE PRODUCT USE GUIDE PRIOR TO PLANTING. The STS® gene will not safeguard this variety against other herbicide chemistries which are labeled to be used only over-the-top of crops that have a different and specified herbicide resistant gene. Always read and follow herbicide directions prior to use. ACCIDENTAL APPLICATION OF INCOMPATIBLE HERBICIDES TO THIS VARIETY COULD RESULT IN TOTAL CROP LOSS.</p> <p>STS®, DuPont™, Synchrony® XP and Classic® are trademarks and service marks of Dow AgroSciences, DuPont or Pioneer, and their affiliated companies or their respective owners.</p>

Corteva Agriscience™ - TECHNOLOGY USE AGREEMENT

This Technology Use Agreement is entered into by Grower and Corteva Agriscience™ (defined below) to set forth the terms and conditions upon which Grower shall use Seed containing Corteva Sourced Technology.

By signing below the undersigned represents and agrees that: (1) he/she has read and understands the terms and conditions of this Agreement, including the terms and conditions on the next page, (2) he/she is fully authorized to enter into this Agreement on behalf of the Grower identified in the Grower Information Box below, and (3) the terms and conditions of this Agreement are legally binding on the Grower and all individuals and entities that will plant and grow crops from Seed on behalf of the undersigned and the Grower.

"Agreement" means, as of any date of determination, this Technology Use Agreement, the then current (i) Product Use Guide(s) and (ii) Update Notification(s), all of which are incorporated herein and deemed a material part of this Agreement.

"Colex-D® Technology" means a Corteva-proprietary herbicide technology package comprised of 2,4-D choline, advanced formulation science and innovative manufacturing processes, which is specifically designed to provide ultra-low volatility, minimized potential for physical drift, decreased odor and improved handling characteristics.

"Corteva" and "Corteva Agriscience" means, collectively, DAS, Pioneer, DuPont, and their affiliated companies.

"Corteva Licensee" means an entity that has a valid, active agreement with DAS or Pioneer granting it a license to produce and sell Corteva seed trait technology in its seed products.

"Corteva Sourced Technology" means proprietary germplasm and all current and future seed trait technology as set forth in applicable Update Notification(s). Corteva Sourced Technology currently covered as Licensed Rights by this Agreement includes, but is not limited to, the Patents listed in Update Notification(s) provided at the time of execution of this Agreement or thereafter.

"DAS" and "Dow AgroSciences" mean Dow AgroSciences LLC.

"DuPont" means E. I. du Pont de Nemours and Company.

"Enlist™ Herbicides" means agricultural products that contain 2,4-D choline herbicide featuring Colex-D Technology.

"Grower" means the individual farmer or farming entity identified in the applicable Grower Information Box.

"Licensed Rights" means all patent claims, trade secrets, rights existing under the US Plant Variety Protection Act (or its foreign equivalents), and other intellectual property rights relating to Corteva Sourced Technology that are reasonably necessary for a Grower's exercise of the limited license granted under numbered Article 2 herein with respect to Purchased Seed or Seed Stock. The Licensed Rights as of any date of determination are set forth in the current Update Notification

For further information or to view the current Technology Use Agreement, Update Notification or a Product Use Guide, go to www.traitsstewardship.com or contact Corteva Agriscience at 1-877- 4-TRAITS (1-877-487-2487).

Revision date: June 2019 / Corteva Agriscience™ U.S. TUA

PROHIBITED ACTIVITIES:

Grower acknowledges and agrees that Grower is NOT permitted to:

- supply, transfer, license or sublicense any Seed, Seed Stock, or Corteva Sourced Technology to any other person, entity or other third party for planting or any other purposes;
- accept any Seed or Seed Stock from any third party other than a Seed Seller, Corteva, or a Corteva Licensee;
- following burndown, use any phenoxo auxin herbicide-containing product (e.g., containing 2,4-D, 2,4-DB, MCPA, dichlorprop, LV6, MCPB, mecoprop which is NOT expressly labeled for use in conjunction with Enlist crops, including pre-emergent use;
- following burndown, use any AOPP herbicides (e.g., quizalofop, cyhalofop, haloxyfop, diclofop, fenoxaprop, fluzifop) not expressly labeled for Enlist corn on emerged Enlist corn;
- following burndown, use any pyridine auxin herbicides (e.g., triclopyr, fluroxypyr) on emerged Enlist crops;
- save, clean or use any crop produced from Seed for planting, and not to supply crop produced from Seed to anyone for planting. The planting of any crop produced from Seed is not licensed and shall constitute infringement of Corteva's Patents, unless specifically permitted by a written agreement with Corteva or a Corteva Licensee.
- plant Seed for seed production unless, and only if, Grower has entered into a valid, written Seed production agreement with Corteva or a Corteva Licensee, which agreement requires Grower to either physically deliver to Corteva or the Corteva Licensee, sell for non-seed purposes or use for non-seed purposes all of the Seed produced; and not to purchase or otherwise obtain from Corteva or the Corteva Licensee any of the Seed produced unless, after physical delivery by Grower to Corteva or the Corteva Licensee, that Seed has been conditioned, packaged and delivered by Corteva or the Corteva Licensee to Grower in the same manner as Seed sold by Corteva or the Corteva Licensee to growers who have not entered into a Seed production agreement; and
- use or allow others to use Seed, plant any Seed, or use any crop or plant material produced from Seed, for crop breeding, research, or generation of herbicide or other regulatory registration data. Grower may not conduct research on Grower's crop produced from Seed.

Grower further acknowledges and agrees that the limited license(s) granted herein do not convey or otherwise transfer any ownership rights of Corteva Sourced Technology to Grower.

3. UPDATES AND DOCUMENTS THAT ARE PART OF THIS AGREEMENT:

The Update Notification is incorporated herein and deemed a material part of this Agreement once posted on the Corteva Agriscience™ website (www.traitsstewardship.com). For so long as Grower has a valid Agreement in effect with Corteva, Corteva will provide notice of Update Notifications to Grower to the email address or physical address provided by Grower above.

New Guides are incorporated herein and deemed a material part of this Agreement once posted on the Corteva Agriscience website (www.traitsstewardship.com). Current Guides will be available from Seed Sellers, from Corteva directly and/or on the Corteva website (www.traitsstewardship.com).

Until this Agreement is terminated or superseded as set out in Article 5, the terms and conditions of use set forth on the packaging (including bag tags) of Purchased Seed are incorporated herein and deemed a material part of this Agreement.

Grower acknowledges and agrees that updates of this Agreement, any Update Notification and any Product Use Guide published from time to time by Corteva are incorporated herein and deemed a material part of this Agreement once posted on the Corteva Agriscience website (www.traitsstewardship.com).

Grower's use of Seed after Corteva posts on the Corteva Agriscience website (www.traitsstewardship.com) updates of this Agreement, an Update Notification or a Guide, or a new Update Notification or a new Guide, constitutes Grower's acceptance of and agreement to be bound by the provisions of such updated or new documents.

Inconsistencies among (i) the Update Notification, (ii) the Technology Use Agreement, (iii) relevant Guide(s), each as posted on www.traitsstewardship.com at the time Grower opens a bag or container of Seed for planting, and (iv) the packaging of the Purchased Seed, shall be resolved in the following order: first, in favor of the Update Notification, second, the Technology Use Agreement, third, the Guide(s), and fourth, the packaging of the Purchased Seed.

4. STEWARDSHIP AND COMPLIANCE:

Grower agrees to read and follow all applicable Guides, the terms and conditions set forth on the packaging of the Purchased Seed, and product labels associated with Corteva Sourced Technology and Enlist Herbicides. You must follow the best management practices, recommendations, and guidelines provided in all applicable Guides.

Grower agrees to read and follow all Insect Resistance Management (IRM) requirements set forth in the Guide, including any requirements to establish and maintain a refuge. Failure to follow IRM requirements can result in loss of access to insect protected hybrids for at least one year.

Grower acknowledges and agrees that, following burndown, the only 2,4-D-containing herbicide products that may be used with Enlist crops are products that feature Colex-D Technology and are expressly labeled for use on Enlist crops.

Grower agrees to follow herbicide resistance management (HRM) practices, such as pre-and post-application field scouting and reporting. Lack of herbicide efficacy must immediately be reported to Corteva.

Grower agrees to provide Grower's reasonable cooperation to Corteva and the Representatives in connection with their efforts to verify Grower's compliance with stewardship, IRM, HRM and other requirements hereof, including, but not limited to, completing written and oral questionnaires and cooperating with Corteva and third party on-farm IRM compliance assessments.

Grower authorizes the Representatives to enter upon land where Grower has planted or is growing Seed as well as any refuge area and access to bins, wagons or seed storage containers for purposes of examining the land and Grower's crop and taking samples of crops, crop residue or seeds located thereof. Such inspection, examination or sampling shall be available to Corteva and the Representatives only after Corteva or the Representatives deliver or mail to the Grower written notification at least three (3) days in advance and Corteva or the Representatives also have reasonably attempted to discuss the visits with the Grower in advance of the visit. Corteva will indemnify Growers for entry by Corteva employees or the Representatives onto land, but not for Grower's gross negligence or a violation of the law.

Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Seed products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Corteva's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Any crop or material covered by this Agreement including, but not limited to, proprietary plant varieties and/or hybrid products can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers must talk to their grain handler or product purchaser to confirm their buying position for these products, and Grower shall direct crops, grain, or material produced from Seed only to appropriate markets. Any crops, grain, or material produced from Seed can only be exported to, or used, processed, or sold in countries where all necessary regulatory approvals have been granted. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

Grower authorizes the Representatives to review the USDA Farm Service Agency crop reporting information, including Form 578 and corresponding aerial photographs.

Upon the request of the Representatives, Grower shall furnish copies of invoices and other relevant documents for Grower's purchases of seed and chemical transactions, and Grower will disclose to the Representatives certain information, including the locations of all fields, to confirm compliance with this Agreement following Corteva's actual (or attempted) oral communication with Grower and not later than

seven (7) days after the date of a written request from Corteva, including the locations of all fields planted with crops containing Corteva Sourced Technology, the identities of all herbicides applied to these fields, and other data as specified in the Guide(s).

Grower hereby consents to the collection, use and disclosure of Grower's personal or company data and purchase information by and among: (i) Corteva and its affiliated companies, including parents, subsidiaries and affiliates ("Corteva"); (ii) retailers, including but not limited to Seed Sellers, from which Grower purchases Corteva products; (iii) Corteva partners and service providers for the purpose of administering Corteva offers, including validation of product purchases and calculation/issuance of rebates and rewards; and (iv) Corteva partners and service providers for purposes of conducting on-farm IRM or other compliance assessments.

5. TERM AND TERMINATION:

This Agreement, once signed by Grower and accepted by Corteva, will remain in effect until terminated or superseded. Grower or Corteva may terminate this Agreement at any time and for any reason by sending written notice of termination to the other party at the address specified in section A, B or D above. In addition to the foregoing, Corteva reserves the right to revoke Grower's right to use any Corteva Sourced Technologies upon notice to the Grower. In the case of termination by Grower, such notice of termination must include Grower's full name, address, and license number. Upon termination of this Agreement or a license granted hereunder with respect to any Corteva Sourced Technology for any reason, (i) Grower shall terminate the use of all Seeds containing the particular Corteva Sourced Technology which may require destruction; (ii) Grower shall return unused Seeds containing such Corteva Sourced Technology to Corteva at Grower's cost; and (iii) Grower will no longer have a right to purchase or use Seed containing such Corteva Sourced Technology. Notwithstanding the foregoing, Grower's obligations and Corteva's rights that arose under the Agreement prior to termination will continue in effect.

6. CORTEVA SOURCED TECHNOLOGY FEES:

Grower agrees to pay a designated Corteva entity or Corteva Licensee all applicable fees that are a part of, associated with or collected with the purchase and use of any Seed and/or Corteva Sourced Technology upon Corteva's payment terms then in effect. Corteva reserves the right to change from time to time the amount of and how it charges Corteva Sourced Technology fees. Grower shall pay interest to Corteva on any past-due fees at the rate of 1.5% per month (18% per annum) or the maximum amount permitted by law, whichever is less, from the applicable due date for such fees until paid. Any payments received by Corteva may be applied to unpaid fees, interest or other charges in Corteva's discretion.

7. LIMITATIONS OF WARRANTIES AND REMEDIES:

Corteva warrants that the Corteva Sourced Technology contained in the Purchased Seed licensed hereunder conforms to the written description(s) in the Update Notification(s) and on the packaging of the Purchased Seed when used in accordance with the directions and in compliance with this Agreement. This warranty applies only to the Corteva Sourced Technology contained in Purchased Seed.

THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING ANY WARRANTIES OF MERCHANTABILITY AND/OR OF FITNESS FOR A PARTICULAR PURPOSE WHICH ARE HEREBY DISCLAIMED.

Because Corteva must have sufficient time to investigate any claim regarding the performance or non-performance of Purchased Seed and/or Corteva Sourced Technology, no claim can be asserted against Corteva unless Grower gives notice to Corteva within fifteen (15) days after Grower first observes indications that the performance of the Purchased Seed and/or Corteva Sourced Technology is not as warranted.

GROWER'S EXCLUSIVE REMEDY FOR ANY CLAIM OR LOSS, INCLUDING, WITHOUT LIMITATION, CLAIMS ALLEGING STRICT LIABILITY OR NEGLIGENCE, SHALL BE LIMITED TO: (i) REPAYMENT OF THE AMOUNT OF THE PURCHASE PRICE OR (ii) REPLACEMENT OF THE AFFECTED PURCHASED SEED. IN NO EVENT SHALL CORTEVA, ITS AFFILIATES, DEALERS OR LICENSEES BE LIABLE FOR ANY INCIDENTAL, SPECIAL, PUNITIVE, OR CONSEQUENTIAL DAMAGES IN CONNECTION WITH SEED AND/OR CORTEVA SOURCED TECHNOLOGY.

8. ADDITIONAL PROVISIONS:

Grower agrees to communicate all applicable terms, conditions and restrictions on Seed whether under this Agreement, a Guide, an Update Notification or otherwise to all persons and entities possessing or taking an interest in Grower's Seed and grain therefrom.

Except as provided herein, notices to Grower or to Corteva shall be sent to the addresses specified in sections A, B or D above.

Grower agrees that should any information provided to Corteva herein change, Grower will promptly notify Corteva via section D above.

Nothing in this Agreement shall be construed as a grant or license from Corteva to the Grower for the use of any Corteva trademark. Grower is required to enter a separate trademark license from Corteva to use any Corteva trademark(s), including but not limited to those marks associated with the Enlist trait, seed, technology or products.

Grower's rights under this Agreement may not be transferred or assigned to any other person, entity or third party without the prior written consent of Corteva.

This Agreement (including documents and updates incorporated herein pursuant to Article 3 hereof) constitutes the entire agreement between Grower and Corteva regarding the use of Purchased Seed and Corteva Sourced Technology. All prior agreements and understandings between Grower and Corteva with respect to Purchased Seed and Corteva Sourced Technology are hereby superseded.

If any provision in this Agreement is determined to be void or unenforceable, the remaining provisions shall remain in full force and effect.

The failure of Corteva or any Third-Party Technology providers to exercise one or more of its rights under this Agreement on one or more occasions shall not be deemed a waiver to exercise such right(s) on one or more subsequent occasions.

No class actions: Any dispute arising out of or relating to this Agreement may only be brought on an individual basis, and may not be resolved on behalf of a class, as a private attorney-general, or in any other representative capacity. Grower shall not participate in or collect payment as a result of any class, collective, or other representative action of any kind against Corteva.

Jurisdiction and Governing Law: This interpretation and enforcement of this Agreement shall be governed by the laws of the State of Iowa without regard to its choice of law provisions. THE PARTIES CONSENT TO THE SOLE AND EXCLUSIVE JURISDICTION AND VENUE OF THE U.S. DISTRICT COURT FOR THE SOUTHERN DISTRICT OF IOWA, CENTRAL DIVISION, AND THE DISTRICT COURT OF THE COUNTY OF POLK, IOWA, FOR ALL CLAIMS AND DISPUTES ARISING OUT OF OR CONNECTED IN ANY WAY WITH THIS AGREEMENT AND/OR THE USE OF THE SEED OR THE TECHNOLOGY. THE PARTIES WAIVE ANY OBJECTION TO VENUE IN THE CENTRAL DIVISION OF THE U.S. DISTRICT COURT FOR THE SOUTHERN DISTRICT OF IOWA, INCLUDING THOSE BASED, IN WHOLE OR IN PART, ON THE DIVISIONAL VENUE LOCAL RULE(S) OF THE U.S. DISTRICT COURT FOR THE SOUTHERN DISTRICT OF IOWA. Grower and Corteva unconditionally waive any right to trial by jury in any action, proceeding or counterclaim in any way arising out of or relating to this Agreement.

Enforcement Costs: Grower agrees that Corteva and any owners of the patents covered by this Agreement shall be entitled to recover any costs or expenses, including, but not limited to, court costs or reasonable attorneys' fees, it incurs in enforcing its rights under this Agreement.

For further information or to view the current Technology Use Agreement, Update Notification or a Product Use Guide, go to www.traitsstewardship.com or contact Corteva Agriscience at 1-877- 4-TRAITS (1-877-487-2487).

Notes

Notes

Always follow grain marketing, stewardship practices and pesticide label directions in accordance with the Product Use Guide (PUG) or other product-specific stewardship requirements including grain marketing and pesticide label directions.

Varieties with the Genuity® Roundup Ready 2 Yield® (RR2Y) trait contain genes that confer tolerance to glyphosate, the active ingredient in Roundup® brand agricultural herbicides. Roundup® brand agricultural herbicides will kill crops that are not tolerant to glyphosate. Genuity®, Roundup®, Roundup Ready 2 Yield®, Roundup Ready® and Roundup Ready 2 Xtend® are trademarks or registered trademarks of Monsanto Technology LLC used under license. Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.

LibertyLink®, Liberty®, the LibertyLink logo and the Water Droplet Design are registered trademarks of BASF.

STS® DuPont™, Synchrony® XP and Classic® are trademarks and service marks of Dow AgroSciences, DuPont or Pioneer, and their affiliated companies or their respective owners.

The transgenic soybean event in the Enlist E3™ soybean was jointly developed and owned by Dow AgroSciences LLC and M.S. Technologies, L.L.C. Enlist Duo® and Enlist One™ herbicides are not registered for sale or use in all states or counties. Contact your state pesticide regulatory agency to determine if a product is registered for sale or use in your area. Enlist Duo and Enlist One herbicides are the only 2,4-D products authorized for use with Enlist crops. Consult Enlist herbicide labels for weed species controlled. Always read and follow label directions.

Corteva Agriscience™ is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS Product Launch Stewardship Guidance and in compliance with the Corteva Agriscience policies regarding stewardship of those products. In line with these guidelines, our product launch process for responsible launches of new products includes a longstanding process to evaluate export market information, value chain consultations, and regulatory functionality. Growers and end-users must take all steps within their control to follow appropriate stewardship requirements and confirm their buyer's acceptance of the grain or other material being purchased. For more detailed information on the status of a trait or stack, please visit www.biotradestatus.com.

Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

Corteva Agriscience (or its chemical company partners) shall have no liability whatsoever for any losses or damages resulting from, or related to, or in connection with, (a) the use of incorrect herbicides applied to soybean products that contain the herbicide tolerant traits or (b) non-compliance with any of the other instructions set forth above, and all such liability is hereby expressly disclaimed by Corteva Agriscience and waived by you. If you have any questions on anything outlined in this document or would like additional information please contact your local sales representative.
