

## The Sentricon® system serves as a permanent eviction notice to termites.

The Sentricon® system solves termite concerns for commercial property managers of:

- Multifamily housing
- Schools, hospitals and health care facilities
- Hotels and hospitality facilities
- Factories and warehouses
- Government and military buildings
- Food processing and manufacturing facilities
- Large or complex structures
- Buildings where service-related disruption needs to be minimized

# Commercial-grade termite protection.

Following a complete inspection, your Certified Sentricon Specialist™ will install in-ground bait stations around the property perimeter. Foraging termite workers find and share the bait with their colony. The result, as documented by more than 60 scientific studies: The colony — including its queen, the ultimate source of the problem — dies. Sentricon then stays in place, protecting against attacks by new termite colonies.

With the Sentricon® system, there's no structural drilling, trenching around buildings or unnecessary treatment of the soil. The ability to eliminate termite colonies without impacting property has made Sentricon the solution to protect over 4 million properties. What's more, the active ingredient in Sentricon poses no hazard to people or pets, and the bait is installed below the soil surface inside tamper-resistant bait stations.

## The Sentricon® system works for you, not for termites.

No digging or trenching

No structural drilling

No need to treat the soil

No scheduling hassles

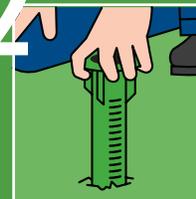

Only the industry's best are selected to install and service Sentricon. These Certified Sentricon Specialists™ undergo extensive training and utilize state-of-the-art data management tools to ensure your home is properly inspected and protected.

### 1 INSPECT

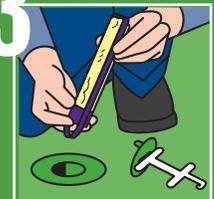

A Certified Sentricon Specialist checks for signs of termites.

### 2 INSTALL

Stations are placed around the property, and the bait immediately begins working.

### 3 SERVICE

Your Certified Sentricon Specialist makes sure the stations are always working.
